

TEMPERATURE DATA LOGGER WITH EXTERNAL SENSOR

Model: SUNLOG-2B-EX

Sunsui's **SUNLOG-2B** Series includes data loggers designed to measure and record low temperature readings. User can extract the data from PC or mobile app connectivity.

FEATURES:

- External sensor probe for low temperature up to -200°C
- Large LCD display with alarm indication.
- Bluetooth connectivity for data extraction and configuration
With mobile App or PC app.
- Handy model with easy installation.
- Automatic Bluetooth connectivity facility without pressing key.

Connectivity options:

A) Data transfer to Smartphone with SUN-App

B) Data transfer to SUN-DESK using Bluetooth Dongle

Specifications:

Type	Multiuse
Sensor	External RTD Temperature sensor.
Temperature Range	-100°C to 300°C
Accuracy	0.5°C (-100 to 80)
Resolution	0.01 upto ±99.99
Memory	40,000 readings
Start mode	Manual / Auto

Battery	Lithium 1/2AA battery.3.6V
Battery life	2 Months @ 15Min interval.
Connectivity	Bluetooth with 30 Meter LOS.
Log Interval	Programable through mobile or PC App
Alarm Range	Programable through mobile or PC App
